## EDUCATION & HONORS

University of Delaware, College of Engineering,

Expected May 2026

Major: Bachelor's degree in Computer Science, Minors: Game Design, Interactive Media

GPA: 3.7

Dean's List x5

CITI Human Research certification

2025

## HARD SKILLS

- Languages: Conversant in English & Turkish
- Coding/Frameworks: C++, JavaScript, Python, HTML, CSS, Typescript, React, Next JS, Node JS, Tanstack, Render, Cloudflare
- Software proficiency: Google Workspace; Microsoft Word & Powerpoint; Photoshop; Blender; Unity; Git; Github; Figma

## RELEVANT CLASSES

- CISC 437: Database Systems, CISC 474: Advanced Web Technologies, CISC 482: Human-Computer Interaction,
- CISC 374: Educational Game Design, CISC 375: Software Engineering & DevOps

## WORK EXPERIENCE

**Research assistant, UI/UX design,** for Sensify Lab,

January 2026- Current, Newark, DE

- UI/UX Research Assistant designing a Canvas dashboard to help CS1 instructors identify & support struggling students.
- Conducted need-finding surveys; built wireframes & Figma/web prototypes using TypeScript, KnockoutJS, GitHub workflows & data visualization techniques.

**Illustrator Internship,** for The UD Review,

February 2024- Current, Newark, DE

- Collaborate with editors & the visuals team to design digital illustrations that enhance storytelling & reader engagement across web & print platforms. Adapt designs for multiple formats, including responsive web articles & print layouts, ensuring visual impact.
- Produce 3- 6 illustrations per month, applying principles of visual hierarchy, accessibility, & high quality under deadlines.

**CISC275 Teacher Assistant,** for Introduction to Software Engineering,

September- December 2024, Newark, DE

- Led weekly lab sessions & graded coursework for ~10 students, providing hands-on guidance in frontend & web dev concepts.
- Taught core web technologies & concepts for TypeScript, HTML, & CSS, & agile methodologies/scrum development practices.
- Supported students through office hours & asynchronous communication (Discord, email), offering technical debugging assistance & project feedback.

## PROJECTS

**DyslexEase,** UI/UX designer & frontend Development, **2nd Place for best accessibility Hack,**

HenHacks, March 2024

- 24-hour, competed against 300 Students in a team of 2, further implementation added later. Programmed a React website to help Dyslexic students & professors. Web interface designed to make files Dyslexia-friendly by enabling tailored settings.
- UI/UX & frontend: wireframe & implementing frontend functionality: [selinabacaz.github.io/CapstoneDyslexease/](https://selinabacaz.github.io/CapstoneDyslexease/)

**Goldfish Brain,** Lead UI/UX designer, full-stack Development & Product Manager,

September- December 2025

- Designed & developed a full-stack gamified task-management website that boosts user motivation by turning to-do lists into an interactive fishing game, with persistent accounts & real-time task tracking: [f25-cisc474-red.bnauta0.workers.dev/](https://f25-cisc474-red.bnauta0.workers.dev/)
- Technologies & responsibilities: Render, Prisma, Tanstack, NodeJS, NestJS, Tailwind, React, Wireframing, UI/UX, Frontend

**GardenPlotPlanner,** Lead UI/UX Designer, Frontend Developer,

September- December 2025

- Led mobile-first design of a gardening assistant app designed to simplify plant care. The app scans seed packets to extract planting information using the *Verdantly API* for personalized gardening advice: [github.com/TheLuckyman30/GardenPlanner](https://github.com/TheLuckyman30/GardenPlanner)
- Performed all functions of a user experience designer by utilizing UX practices, conducting user interviews to gather needs & pain points, & translating insights into user flows, site maps, wireframes, storyboards, & various prototypes with Figma.

**Career Chef,** Project Manager & Lead web designer,

January- May 2024

- Led the visual design & development of a career assessment web application that leverages GPT-4 Turbo to generate personalized job recommendations & industry best-practice insights.
- Performed functions of Team manager & UI/UX designer by upholding the team's Agile methodologies, assigning & managing tasks. Utilized wireframing tools & implemented responsive design. Backlog: [selinabacaz.github.io/starter\\_help/](https://selinabacaz.github.io/starter_help/).
